Installation Package 7 includes all labor, permit charges, and materials listed above to install your emergency egress escape window system.

Installation steps:

1. Superior Glass Block and More has property staked and assessed.
2. A hole is dug in the ground measuring 6 x 6 x 6 feet.
3. Drainage is created by placing perforated tubing and pea stone in the base of the hole.
4. Basement wall is cut 32 x 58 inches to replace existing window space. Extra cost to create a new window space.
5. Well is installed.
6. Window is installed.

- Price includes all clean-up and debris hauled away.
- No interior wood trim included.
- Not responsible for any dust that may occur.
- Customer must allow a clear path to all windows on the inside and outside of the home.
- Not responsible for any damaged to bushes, flowers, etc not cleared away from the window installation area.
